AI Agents and Agentic AI with Python & Generative AI

Prompt Engineering for ChatGPT

AI Agents and Agentic AI Architecture in Python

Oct 15, 2026

ROEL R. HINGABAY

has successfully completed the online Specialization

AI Agents and Agentic AI in Python: Powered by Generative AI

This certificate recognizes the successful completion of the AI Agents & Agentic AI in Python Specialization, demonstrating expertise in designing, building, and optimizing autonomous AI agents from the ground up. The holder of this certificate has mastered core agent principles, including agent loops, self-prompting, tool integration, multi-agent collaboration, and robust API interaction—without relying on short-lived frameworks. This credential certifies a deep understanding of AI agent architecture and design, equipping the recipient with the ability to develop powerful, scalable, and maintainable AI systems optimized for efficiency, adaptability, and real-world impact. Graduates of this specialization possess the skills to engineer cutting-edge AI agents.

Jules White

Dr. Jules White, Professor of Computer Science, Senior Advisor to the Chancellor on Generative AI in Enterprise

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
