ROEL R. HINGABAY

has successfully completed the online Specialization

Mastering Claude AI: Prompting, APIs, RAG, and MCP

Learners who completed the Mastering Claude AI: Prompting, APIs, RAG & MCP specialization demonstrated the ability to effectively use Anthropic's Claude across prompting, application development, and system-level AI design. They gained hands-on experience understanding Claude's behavior, applying Constitutional AI principles for safe and reliable outputs, working with long documents using artifacts, and designing clear, structured prompts. They also built intelligent applications using the Claude API, including multi-turn conversational systems, structured JSON responses, and task-based logic. The specialization further equipped learners to design production-ready AI systems using Retrieval-Augmented Generation (RAG) and the Model Context Protocol (MCP), enabling robust knowledge retrieval
