WORK EXPERIENCE

Asialink Finance Corporation
PASIG CITY, ORTIGAS CENTER

Digital Solution Analyst
January 2026 - May 2026

- Collaborated with business units and stakeholders to identify process gaps, gather requirements, and translate operational needs into scalable digital solutions.
- Managed the end-to-end solution lifecycle, including discovery, process analysis, prototyping, development, user acceptance testing, deployment, and post-production support.
- Served as a Power Platform developer working across Power Apps and Power Automate, helping modernise manual workflows into structured digital processes that improved efficiency, control, and reliability.

GoodDeal Financing Inc.
PASIG CITY, ORTIGAS CENTER

Management Information Systems Associate (MISA)
August 2025 - December 2025

- Managed and enhanced operational reporting through Power BI and Excel, producing accurate dashboards and analytical reports tailored to management and cross-departmental requirements.
- Monitored, analysed, and resolved system and workflow issues across Trello, IDMeta, AI Rudder, and related platforms, while conducting quality assurance checks and recommending process improvements based on error trends and operational data.
- Supported business operations by automating lead and data workflows, providing technical support across platforms and devices, delivering digital literacy training for sales personnel, coordinating ticketing processes across MIS systems, and assisting with financing and accountancy workflows within SOFIA.

PROJECTS

Airfare Booking System

- Developed and deployed a Power Apps-based Airfare Booking System for 2,500+ users across 16 departments, digitising a previously manual travel request process into a faster and more reliable paperless workflow.
- Designed and implemented the solution using Power Apps and Power Automate, enabling structured L1 and L2 approval routing across senior stakeholders, including the CEO, COO, Group Head, General Manager, Area Manager, Branch Manager, PGS, and Accounting.

Ticketing System

- Developed and deployed a Power Apps-based Ticketing Management System that centralised support requests and improved the management of issue assignment, prioritisation, and resolution tracking.
- Created front-end, back-end, and automation components using Power Apps and Power Automate to support structured workflows, better monitoring, and improved response handling.

EDUCATION

Taguig City Unviersity
Bachelor of Science in Information Systems (2021- 2025)
